

at the DGS means...

- Designing and operating buildings that save energy and conserve resources
- Attaining U.S. Green Building Council LEED certification in state facilities
- Buying environmentally preferable products
- Greening statewide contracts for everything from office supplies to printers
- Maximizing energy efficiency in our buildings
- Purchasing carpet that meets strict sustainability standards
- Using ENERGY STAR electrical equipment
- Saving energy through power-management software for our computers
- Installing solar power panels at state facilities
- Exploring applications for fuel cell technology
- Using 100 percent recycled-content paper
- Printing two-sided copies on networked printers
- Driving low- or zero-emission vehicles
- Recycling office paper, beverage containers and newsprint

...and much, much more!
